

1. **blog.html**

- **Purpose:** Displays a list or feed of blog posts.
- **Typical Content:**
 - A loop to show multiple posts or articles.
 - Summaries or excerpts with links to full posts.
 - Pagination controls, if applicable.
 - A main content area for blog-related features or filters.

2. **contact.html**

- **Purpose:** Provides a form or information for users to contact the site owner or support team.
- **Typical Content:**
 - A contact form (name, email, message fields).
 - Company or site contact details (email, phone, address).
 - Validation messages for successful or failed form submissions.

3. create.html

- **Purpose:** Allows users (or admins) to create new content (e.g., a new blog post, item, or record).
- **Typical Content:**
 - A form with relevant fields (title, body, attachments, etc.).
 - Validation messages or error handling.
 - Buttons for submitting or canceling.

4. footer.html

- **Purpose:** Serves as the reusable footer partial included on multiple pages.
- **Typical Content:**
 - Copyright information.
 - Quick navigation links (e.g., Home, About, Contact).
 - Social media icons/links.
 - Optional site credits.

5. `header.html`

- **Purpose:** Serves as the reusable header partial included on multiple pages.
- **Typical Content:**
 - Site logo or brand name.
 - Navigation menu links (e.g., Home, Blog, Contact, Profile).
 - Search bar (if applicable).
 - User account links (Sign In / Sign Up / Profile).

6. `index.html`

- **Purpose:** The home page of your site.
- **Typical Content:**
 - A welcome message or hero section.
 - Highlights of recent or popular posts/items.
 - Call-to-action buttons (e.g., “Sign Up”, “Learn More”).
 - Brief site overview.

7. `post-details.html`

- **Purpose:** Displays a single post in detail.
- **Typical Content:**
 - Post title, author, publish date, main body text.
 - Images, media, or attachments related to the post.
 - Comment section or related posts.
 - Edit/delete buttons (for authorized users).

8. `postedit.html`

- **Purpose:** Allows editing an existing post.
- **Typical Content:**
 - A form pre-filled with the post's current data (title, body, etc.).
 - Save or cancel buttons.
 - Validation and error messages.

9. `profile.html`

- **Purpose:** Displays a user's profile information.
- **Typical Content:**
 - User's avatar/picture.
 - Personal information (username, email, bio, etc.).
 - Links to edit profile, view user's posts or messages.
 - Optionally, social media or personal website links.

10. `profileedit.html`

- **Purpose:** Allows editing a user's profile information.
- **Typical Content:**
 - A form pre-filled with the user's current profile data.
 - Input fields for username, email, bio, avatar upload, etc.
 - Save or cancel buttons.
 - Validation and error messages.

11. `signin.html`

- **Purpose:** Enables users to sign in (log in) to the site.
- **Typical Content:**
 - Username/email and password fields.
 - "Remember me" checkbox, if desired.
 - Links to "Sign Up" or "Forgot Password" pages.
 - Validation and error messages.

12. **signup.html**

- **Purpose:** Enables new users to register an account.
- **Typical Content:**
 - Form fields for user data (username, email, password).
 - Password confirmation.
 - Link to “Sign In” if the user already has an account.
 - Validation and error messages.
